**1. Each Construction item should be kept in different layer;**

**For example:**

- a. Openings of 7' height and 7.5' height should be in different layers.
- b. 6" brickwork and 4" brickwork should be in different layers.
- c. No single item should be kept in more than one layer.
- d. Doors windows should be in different layers.

**2. Poly lines should be used for centerline drawing.**

**3. Drawing should be in 1:1 scale.**

**4. No invisible flaws should be there in drawing:**

- a. All polygons should be closed perfectly.
- b. No overlapping of lines should be there at corners.
- c. No crossings of lines should be there at corners.
